

## Mini Project 4: Cascade Style Sheets

Create a new web page, named it as “**mini\_project\_4.html**”, and embedded CSS on it. You’re NOT required to do this unit in Dreamweaver if you prefer to keep using Notepad or other text editors. Don’t feel obligated that you have to master Dreamweaver in this class.

### I. Content of the Assignment

Here are things you need to do in this mini project,

- Create a new page and named it as “**mini\_project\_4.html**”
- Write embedded CSS rules using at least 10 unique selectors to give your mini\_project\_4.html some styles.
- Add a relative link to your Assignments Page on the mini\_project\_4.html page, and a relative link to your mini\_project4.html page on the Assignments Page.
- Make the page xhtml-complaint

### II. How to Submit Your Mini Project 4

After finishing your mini project 4, you will need to

- Upload your mini\_project\_4.html page to your bengal space.
- Create a relative link of mini\_project\_4.html on your Assignments Page and update the assignments.html page on your Bengal as well.
- Type your URL of your mini\_project\_4.html page in the Assignment Text box in the Assignments tool in Sakai.

### III. Evaluation

Your mini\_project\_4.html page will be graded based on the following criteria,

- Have the required style tags (<style>...</style> ) in the head section of the html source code.
- Bind CSS rules to your html source code correctly using at least 10 unique selectors.
- Write valid CSS rules. Each selector should have at least one CSS rule.
- Make your mini\_project4.html page xhtml-compliant.
